

Reassuringly Dimplex

We appreciate that choosing a new fire for your home can be an important decision, which is why you want to be able to see a variety of fires and actually touch, try and see the realism of the flame effect for yourself.

To give you every confidence that you're buying the right fire, we've created a network of Dimplex retailers around the country, each with a range of fires on display. They'll be happy to guide you through all the different options available as well as demonstrating a selection of fires in operation in their showrooms.

Our retailers are your guarantee of the expert advice and individual customer service you can expect from Dimplex.

Centre

Dimplex Centres have a minimum of **four** fires on display including at least **one** from our Optimyst range.

CentrePlus

Dimplex CentrePlus retailers have a minimum of **seven** fires on display including at least **three** from our Optimyst range.

3-Year Guarantee

Wherever you see this logo in this brochure, it means that when you buy the fire featured from a Dimplex Centre or CentrePlus retailer, you are entitled to a free upgrade from our standard 1-year guarantee to a 3-year guarantee. To take advantage of this, simply complete the online registration within 28 days of purchase at www.dimplex.co.uk/register, or call us on 0344 879 3588 if you do not have access to the internet. Products must be installed in accordance with the manufacturer's instructions and maintained in line with the Terms & Conditions, which are available at www.dimplex.co.uk/terms.

Safety First

All Dimplex fires are BEAB approved* - this means they are independently approved to Europe's highest electrical product safety standard.

*Approved or awaiting approval at time of printing

Öpti-V

Opti-V is unlike any other electric flame effect fire. Its flickering flames are created via an HD TV screen with discreet LED lighting glimmering deep in each log. Crackling logs sound effects (with adjustable volume) add to Opti-V's extraordinarily realistic appearance, so if you are looking for something that's going to wow your friends, this is the effect for you.

Opti-V is available in a selection of freestanding stoves and wall mounted fires. Please see technical pages (pages 74-75) for a summary of models.

Beauty of a real fire, the simplicity of electric. An Optimyst fire will captivate you from the moment you see it. Its authentic three-dimensional flame and smoke effect is created by lights reflecting against ultra-fine filtered water mist and the illusion is so realistic that you will you find it difficult to distinguish from the real thing. Optimyst electric fires are the ultimate in 'plug in and enjoy' as most of the fires in this range don't require any installation. Many also come with a 2kW thermostatically controlled heater just in case you need a quick burst of heat. People buy Optimyst simply for the amazing flame effect, which is why the flame effect works independently of the heater*. The flame effect can also be adjusted from gentle 'embers' to 'roaring flame' to give you the flame picture of your choice.

*Specifications for each model do vary, so please check technical details on individual fires on page 74.

Optimyst is available in a wide selection of fires across freestanding stoves, inset or wall mounted fires and complete suites, to enhance the ambiance of any home. Please see technical pages (pages 74-75) for a summary of models.

Optiflame^{3D}

Optiflame 3D offers a new kind of realistic flame effect. For the first time, a 2D effect is given 3D depth, as Optiflame 3D creates the illusion of seeing through the flames to the back of the fire. Optiflame 3D also gives the power of choice over the colour of the flame effect, the flame intensity and the fuel bed. You can add a blue flame to mimic a gas fire or choose a deep orange for a glorious glow. Depending on the time of day, or how you feel, the flame can be adjusted from low to high, or pulsating, plus you can adjust the down lighting to enhance the drama. You can even pick beautiful crystals, realistic logs, coal and pebbles to enrich the luminosity of your own unique fuel bed*. All Optiflame 3D fires come with a 2kW thermostatically controlled heater just in case you need a quick burst of heat, yet the flame effect also works independently of the heater*, so you can still enjoy that cosy feeling on milder days.

*Pebbles available on selected models only.
Please see individual product specifications for details.

*Specifications for each model do vary, so please check technical details on individual fires on pages 74-75.

Optiflame 3D is available in a wide selection of inset fires in different designs and finishes, to complement your home. Please see individual product pages for details.

3D illusion and the power of choice

optifiame is the original Dimplex electric flame effect that revolutionised the market when first launched in 1988. Endlessly refined over the years it remains the UK's most popular electric flame effect, as it's our most cost-effective flame technology. Most Optiflame fires come with a 2kW thermostatically controlled heater just in case you need a quick burst of heat, yet the flame effect also works independently of the heater, so you can still enjoy that cosy feeling on milder days.

*Specifications for each model do vary, so please check technical details on individual fires on pages 74-75.

Optiflame is available in a wide selection of fires across freestanding fires or stoves, inset or wall mounted fires and complete suites, to enhance the ambiance of any home. Please see technical pages (pages 74-75) for a summary of models.

This large cast-iron style stove has a single glass window for optimum viewing of the incredible flame effect and comes complete with the optional sound of gently crackling logs.

SNG20

- Opening door with chrome handle

'H'	700 mm	700 mm
'W'	490 mm	646 mm
'X'	413 mm	569 mm
'Y'	395 mm	395 mm

Our patented Optimyst flame effect creates a stunningly realistic illusion of flames and smoke that is almost impossible to distinguish from the real thing.

This fantastic effect is made possible by one key element: the Optimyst glass disk transducer.

The glass disk transducer is the visual heart of our Optimyst range, sitting inside our products and creating the ultra-fine mist that forms a key part of the world's most realistic flame effect.

How does it work?

The transducer uses ultrasonic technology to create an ultra-fine water mist via a glass/ceramic disk within the transducer which vibrates at high speed. The resultant mist then rises up through the log bed with the aid of a fan in the lower sump and reflects the light from the lamps within the unit, creating an incredibly realistic, three-dimensional illusion of flame and smoke.

Notes: See relevant product page for opening requirements. All dimensions are shown in millimetres. Please allow +/- 5mm tolerance.

After Sales Service

If you require after sales service please visit www.dimplex.co.uk/support.

CE Mark

Our products carry the CE mark complying with European safety standards and the European Standard for electro magnetic compatibility.

British Electrotechnical Approvals Board BEAB Approved

The mark of the British Electrotechnical Approvals Board signifies that the appliance bearing it has been produced to the stringent safety requirements for domestic electrical appliances as laid down in BSEN60335.

All Dimplex electric fires are approved by BEAB or awaiting approval at time of printing.

Specifications

At Dimplex our policy is one of continuous improvement; the Company therefore reserves the right to alter specifications without notice. Although every care has been taken in the reproduction of product finishes in this brochure, the colour photographs and the flame effects should be taken only as a guide. The information contained in this brochure is correct at the time of printing. You are advised to consult your dealer before purchasing. For a list of your local retailers please visit www.dimplex.co.uk

The Dimplex Range

Dimplex offers the widest range of electric space and water heating products in the world – nearly 700 – to meet almost any heating need. In addition to this publication, we have a wide range of brochures for both domestic and commercial applications. Please visit our website for more information.

Dimplex Website

Our website is full of information which may be useful to you including:

- Details of your local Dimplex Centre and CentrePlus retailers including where you can see a particular fire on display
- Videos of the Opti-V, Optimyst and Optiflame effects
- Installation and operating instructions
- How to buy spare parts
